KEEPING THE COMFORTS OF HOME™

## SafetyChoice® – the Perfect Complement to In-Home Care Services

Many seniors want to live independently in their own homes, but they want to do so safely.

SafetyChoice® in-home care technology solutions provide the peace of mind that come with knowing help is at hand, whether responding to an emergency or delivering helpful medication reminders.

When combined with in-home care services, SafetyChoice provides around-the-clock monitoring so help is always available.

Alert is available in wristband, pendant, or belt clip styles.

G2000

### SafetyChoice® Suite of Technology Solutions

The SafetyChoice® Personal Emergency Response System (PERS) provides on-call help when you need it. With a simple push of a button, a response professional at the Centralized Monitoring Station (CMS) will answer the client through the two-way PERS. The response professional will then dispatch the appropriate help—an ambulance, neighbor, family member, or friend.

#### SafetyChoice PERS

The SafetyChoice G2000 PERS is a traditional tabletop console that allows the client access to our 24-hour Centralized Monitoring Station.

LM5000

G4000

The wireless PERS, for clients who do not have a landline, and the smaller, G4000 Compact PERS offer clients greater options.

With its greater range capability, the Home and Yard PERS-LM5000 allows seniors the ability to move more freely around their homes and yards.

Lightweight pendants, wrist bands, or belt clips used with the PERS units allow greater mobility for more active seniors.

#### Medication Solutions

SafetyChoice medication systems offer a safe, affordable way to deliver the right dose of medication at the right time.

### Around-the-Clock Monitoring

The SafetyChoice Centralized Monitoring Station (CMS) never sleeps. Our caring professionals are ready 24-hours a day to respond to alarms received through our clients' in-home technology devices. State-of-the-art technology provides our responders access to detailed information to inform emergency responders about clients' medical conditions and preferences. Ours is one of the few alarm monitoring companies to be rated and approved by Underwriters' Laboratories and Factory Mutual.

#### ACCESSORIES

#### Enhance the Effectiveness of Your PERS for an Added Degree of Home Safety

##### Door and Window Contacts

Programmable motion detectors or sensors signal when a door or window is opened.

##### Help Button

For individuals with mobility or strength restrictive issues, this larger water-resistant pendant can be wall mounted or attached to clothing.

##### Wireless Camera

This camera allows secure, password-protected access to live video of an individual via an Internet connection.

##### Pressure-Sensitive Floor Mats

Wireless floor mats, ideal for those with dementia or who are at risk of falling, send an alarm to the CMS.

##### Smoke and CO<sup>2</sup> Detectors\*

These detectors signal the CMS to dispatch the local fire department.

\*Not available in all provinces.
